

Report to Chale annual parish meeting 13 May 2026

Sustainable Chale Ltd

The company used the small surplus it held from the Chale Community Project (residue of the Ellen MacArthur Foundation grant plus accrued interest) which it had agreed to allocate to a future renewables construction project. It paid this to SWAY, South Wight Area Youth, as a contribution towards the cost of the renewables planned on the site of the new Chale Community Hub.

The directors also continue to monitor market developments in order to identify other opportunities that we can promote within our community although little has changed in their area of interest so far following the change in government.

The directors would also like to recruit one or more new directors and would be pleased to hear from anyone with relevant background and an interest in joining the board.

Malcolm Groves,

Board member, Sustainable Chale Ltd
